D7: US-A-4 369 058 (LEVITT GEORGE), 18 January  
1983 (1983-01-18)**2. Novelty**

The subject matter of claim 1 meets the requirements of PCT Article 33(2). The generic wording of claim 1 of the present application differs from the disclosure in documents D1-D5 by the variable Y, and differs from D6 by the chlorine definition at the ortho position with respect to the sulfonyl unit.

The present compounds as per claim 8 differ from the compounds in D7 by at least the variable Q (cf. claim 1 in D7, variable R2; and column 10, compounds II-B). The process claim 7 is therefore also novel.

**3. Inventive step**

The present application meets the requirements of PCT Article 33(3).

The present application can be considered to address the problem of providing further benzosulfonamide derivatives with improved herbicidal properties.

D1 is regarded as the closest prior art. D1 differs from the present compounds, as indicated

in the paragraph about novelty. The compounds disclosed therein possess herbicidal properties. Owing to the minor structural variation, a person skilled in the art would expect the herbicidal properties of the present compounds.

However, the applicant could demonstrate, on the basis of a comparative test, that the presently claimed compounds possess surprisingly improved properties.

The above-mentioned problem has therefore been solved. The breadth of the claims represents a plausible generalisation of the tested examples.

The intermediate products make a structural contribution to the final products.

An inventive step can therefore be recognised.
